

Being responsible stewards for the environment has always been a meaningful part of our firm culture.

Commitment to Sustainability

Sustainability has been part of MGKF's practice and culture since its inception more than 30 years ago. Being responsible stewards for the environment has always been meaningful to us, dating back to the early 1990's with our participation in U.S. EPA's Green Lights program to the implementation of a formal Sustainability Policy and now with the incorporation of many sustainable aspects into our office design. Our firm has both legal and technical staff, partner Brenda H. Gotanda, LEED AP and technical consultant Michael C. Nines, PE, LEED AP who are LEED® (Leadership in Energy and Environmental Design) Accredited professionals.

We proudly support sustainable efforts within our offices and in the community with our involvement in the following organizations:

- Pennsylvania Bar Association's PLUS Program
- The Law Firm Sustainability Network
- The New Jersey WasteWise Business Network
